#UNIVERSITÉSENGHOR

université internationale de langue française au service du développement africain

A major player in training and capacity building for executives on African development

The institutional Francophonie

Direct operators

#UNIVERSITÉSENGHOR

université internationale de langue française au service du développement africain

Permanent ministerial conferences

Vision

To become a major player in the training and capacity building of executives in and for Africa.

Mission

To train, in French, creative executives capable of meeting the challenges of sustainable development in Africa.

In excellency and innovation

Overall presentation

Senghor University is an international organization, a direct operator of the Francophonie, created in 1989 by decision of the Heads of States and Governments who share the French language, during the Dakar Summit. Its headquarters are in Alexandria, Egypt, and its mission is to train, in French, creative executives capable of meeting the challenges of sustainable development in Africa and Haïti.

With a network of about 350 professors and experts from all over the French-speaking world, as well as collaborations with major national and international institutions, the University delivers excellent training programs of excellence adapted to the African context, in Alexandria, as well as in its 12 campus in Africa and Europe

Senghor University offers some 30 master's programs. Most of them are project management programs in four main fields of action that structure the University into as many departments: Culture, Environment, Management and Health.

Senghor University's short courses welcome about 800 auditors per year.

Through its training programs and its general mission, Senghor University contributes to all objectives of sustainable development.

In 2022, Senghor University has a network of more than 3,200 alumni.

Senghor University in facts and figures

Students at Alexandria campus

- 170 to 200 selected on a competitive basis for the Alexandria campus
- Average of 3000 applicants
- From 25 countries in Africa, Haïti and Europe
- Parity between women and men

Admission requirements

- Bachelor degree
- Professional experience (1 year minimum)
- Less than 36 years old (for scholarship)
- Entrance exam (file | exam | interview)
- 130 scholarship holders (350€ registration fee/year)
- 30 (M1) + 40 (M2) non scholarship holders (3000€ registration fee/year)

 Non scholarship holders take the same service as scholarship holders

International teaching staff

- 4 expatriate department heads to animate the academic life
- 150 external teachers from Africa, Europe and North America, including:
 - 60% university professors
 - 40% experts among the best in their fields

Instances

- Board of Trustees
- Academic Council
- Management committee

Study conditions and living environment

• 11 classrooms fully equipped for video conference

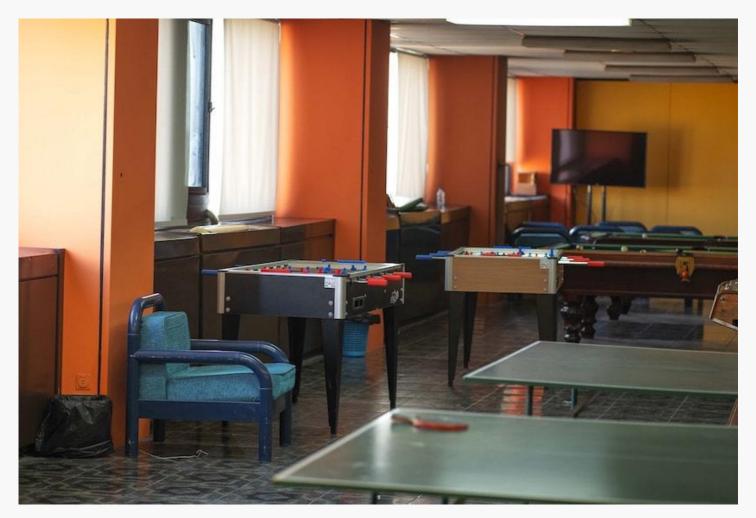

- 8 additional project rooms
- Francophone Digital Campus (AUF)
- Career, professional insertion and innovation Center
- Library (16 kBooks, 76 kEbooks, 520 electronic Journals, Egyptian knowledge bank)
- Audio and video recording studio
- General coverage of wifi + 52 PCs in free access
- Recreation and Sport facilities
- University Restaurant

In our other campuses

- About 350 students in 12 countries
- About 20 running Master programs (mainly M2)
- About 200 teachers (professors and experts) from Africa, Europe and North America

Alumni

More than 3,200 in 2022

At Alexandria, the students benefit from decent housing offered by the University in the heart of the city of Alexandria giving them the opportunity to integrate into the Egyptian life.

At the University, they benefit from a stylish and peaceful environment of working.

The alumni: a large network of development actors in Africa and Haïti

Senghor University has today more than 3,200 graduates (of which about 30% are women) who have completed their university studies in Alexandria or in one of its other campuses. They are spread over 42 countries around the world from Africa, Haïti, Asia and Europe.

An alumnus from Alexandria has been appointed to manage and animate the #ALUMNISENGHOR program

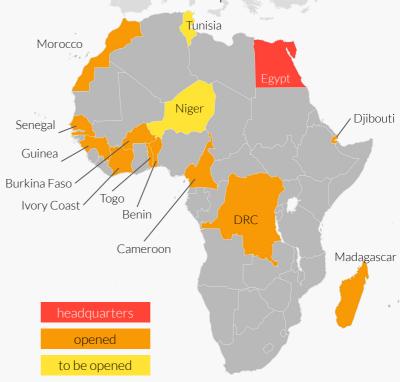

External Campuses

As part of its development policy, external campuses are being opened on the continent to meet the growing needs in training and skills expressed by local partners since the Alexandria headquarters does not have the

capacity to accommodate this.

- 12 Campuses + 2 campuses to open
- 15-20 running master programs
- + 350 students

Hungary

A new campus under construction

In order to better respond to the growing need for higher education in Africa, a new campus is under construction in the city of Borg El Arab, a university hub in the making, with the support of the Egyptian government. The objective is to double the capacity of the Alexandria campus in order receive a new batch of students every year, whereas, at present, there is only one batch every two years.

Competency-based training programs

Current training programs at Alexandria have been designed with 5 main objectives:

- to strengthen students' skills
- to strengthen the autonomy of students
- to make a greater use of the local socio-economical environment in the training
- to enhance the value of the internship and the thesis
- to bring the university closer to international standards

Special emphasis is placed on cross-cutting skills, including critical thinking:

- critical thinking
- communication
- creativity
- collaboration

After one or two years of training, Senghor University issues a master's degree in development.

Active pedagogy

Senghor University promotes, in all of its training programs, active teaching practices that place the student at the heart of the training program and encourage learning. Thus, practical exercises, case studies, and role-playing are encouraged with the lecturers and the emphasis is placed on sharing experiences and acquiring practical, operational, and transversal skills. The program includes one project per semester and a departmental week during which students visit institutions and companies.

Departments

The Departments are primarily responsible for the pedagogical engineering of all the training programs offered in Alexandria as well as on the Senghor Campuses. In Alexandria, they directly manage the 8 training programs, all of which are linked to the objectives of sustainable development

Management of cultural enterprises

MANAGEMENT

HEALTH

Environmental management

Project management

International public health

At Alexandria, students from all specialties can apply for a Master 2 in the cross-disciplinary specialization in Global Risk and Crisis Management. Since this specialization is only offered in M2, their application is part of the normal selection process for this master, which recruits students who have not completed the first year of the Master's degree in development at Senghor University.

Technological revolution

The use of Information and Communication Technologies in education has been a common practice for years through the Department of distance learning. The realities of today's world have encouraged us to continue this momentum by implementing a digital revolution. This has proved very useful during the pandemic of COVID-19.

This technological revolution has been translated into four actions:

- adoption of Google Workspace Education
- fully collaborative work on single documents
- a lifetime email address for students
- a generalized Wifi

Teaching & Learning

List of master programs

- Computing and Internet Certificate (C2i)
- International Business Driving License (IBDL)
- State of law, democracy and development
- Francophonie and Globalization
- African art history
- Culture and Development
- Cultural public policies
- Intellectual property law
- Innovation and cultural entrepreneurship
- Digital: understanding the new deal
- Creative project (6 credits)

Semester 8

- Methods and tools for setting up projects
- Leadership
- Societal marketing
- Information monitoring and documentary research
- Culture departmental Week
- Communication strategies
- Fundamentals of cultural leadership
- Audiovisual market
- Art market, restitution and circulation of artworks
- Culture economics
- Management of Cultural Institutions
- Partnerships negotiation
- Department project (6 credits)

Semester 9 - Management of Semester 9 - Management cultural heritage

- Basic principles of financial and accounting management
- Development economics
- Intangible heritage protection and transmission
- Vade-mecum for responding to a bidding or a consultancy offer
- Sponsoring and Patronage
- Inventory, conservation and restoration
- Archives management
- Libraries management
- Audiovisual heritage management
- National museums and monuments management
- Cultural heritage and new technologies
- Tourism and valorization of cultural heritage
- Specialization project (6 credits)

of cultural enterprises

- Basic principles of financial and accounting management
- Development economics
- Intangible heritage protection and transmission
- Vade-mecum for responding to a bidding or a consultancy offer
- Sponsoring and Patronage
- Legal status of cultural expressions
- Organization of festivals and of other cultural events
- Creative and cultural industries
- Design and financing of cultural projects
- Media and digital cultures
- Risk prevention in cultural activities
- Communication and valorization of cultural activities
- Specialization project (6 credits)

- Thesis writing methodology
- Internship, thesis writing and defense (28 credits)

Master programs in Environment

Semester 7

- English
- Writing and personal presentation skills
- Computing and Internet Certificate (C2i)
- International Business Driving License (IBDL)

- Thesis writing methodology
- Internship, thesis writing and defense (28 credits)

Strategic Plan 2022-2025

#1

#2

#3

#4

Providing a unique training experience

Developing research activities

Consolidating the status of an entrepreneurial university

Consolidating institutional development

Listening to the needs and demand for training, strengthening the skills-based approach and the employability of students through the content and methods of training and increasing distance learning activities Making the teaching program and doctoral school operational, developing interdisciplinary research activities and forging new partnerships with the scientific community

Developing the activities of the Observatory of entrepreneurial initiatives and practices, supporting student entrepreneurship and ensuring that the University remains a partner of choice for training or development projects in Africa

Updating the institutional and organisational framework of the University, building staff capacity, supporting the network of national alumni associations and further developing campuses and partnerships
